## California Proposition 65

Dear Sir or Madam,

According to the current list of California Proposition 65, some items in our delivery programme contain components that fall under this regulation. These include alloy components – such as lead, nickel, cobalt, cadmium and beryllium.

Our products are not essentially hazardous when used as intended. However, corresponding substances can be released during processing, e.g. by welding, melting or grinding. We, therefore, recommend taking suitable protective measures, in order to minimise potential health risks.

For detailed information on the composition of our products, please refer to the respective data sheets and test certificates. Further information on California Proposition 65 can be found at [www.p65warnings.ca.gov](http://www.p65warnings.ca.gov).

Should you have any questions, please do not hesitate to contact us.

Yours faithfully,

Ferd. Haecker GmbH & Co. KG
